\$10.00 Each

The Stoeger M3000 12-Gauge Shotgun offers versatile and reliable performance for turkey, waterfowl, and upland hunting. This semi-auto shotgun features an Inertia Driven[®] system that uses the natural force created when the gun is fired to produce cleaner, more reliable firing with improved precision. This Stoeger shotgun is built with a three-inch chamber designed to handle heavy game loads and three-inch magnum loads without the need for adjustment. A fiber optic front sight offers a clear point of aim while a ventilated stepped rib barrel allows quick target acquisition with faster pointing. Designed to improve bird hunting but reliable enough for other shooting activities, the Stoeger M3000 12-Gauge Shotgun provides a comfortable hold with enhanced handling to take your next hunt to the next level.

This Stoeger M3000 12-Gauge Shotgun has been generously donated by CSHRC members Steve Ewing & Sadie.

Description

The Stoeger M3000 is the perfect choice for hunting game birds. The Inertia Driven semi-automatic shotgun can handle loads up to 3-inch without adjustment, is drilled and tapped to accommodate Weaver-style scope bases, has a fiber optic front sight, and a ventilated, stepped rib.

Features:

- Reliable inertia-driven semi automatic
- High-visibility fiber optic bar sight
- Drilled and tapped receiver for Weaver-style optics mounts
